CAREER OBJECTIVE

Backend software developer with strong expertise in Java, Node.js, Go, and Python, combined with AI/ML and GenAI capabilities, seeking to leverage full-stack development skills and emerging technologies to build scalable, innovative, and intelligent solutions in a dynamic tech environment.

WORK EXPERIENCE

Junior Software Engineer

Aptlogica Technologies Pvt Ltd | October 2024 - Present

1. Working as a Backend Developer with strong expertise in Node.js, Go (Golang), and Python for building scalable enterprise applications
2. Developed comprehensive backend architecture for Authoring Tool project using Node.js, implementing robust RESTful APIs, authentication systems, and efficient data management solutions
3. Currently architecting and developing Sereni Base, a NocoDB-like database management platform using Go with Gin framework, PostgreSQL, Keycloak authentication, JWT tokens, and Docker containerization
4. Built AI-powered text enhancement tool using Python and LLM (Ollama) featuring Grammarly-like functionality including intelligent spell checking, context-aware rephrasing, grammar correction, and style enhancement
5. Developing Bill Generating Agent using GenAI and autonomous agent technologies, implementing intelligent data extraction, processing, and automated document generation
6. Actively researching and implementing various POC (Proof of Concept) features for emerging technologies including AI/ML integration, microservices architecture, and cloud-native solutions
7. Learning and implementing advanced Agent-based systems, GenAI applications, and LLM integration for real-world business applications

8. Working with modern DevOps practices including Docker containerization, CI/CD pipelines, and agile development methodologies

EDUCATION

Bachelor of Engineering in Computer Engineering

Modern Education Society's Wadia College of Engineering, Pune (SPPU)

CGPA: 8.29 | Year of Passing: 2024

HSC (Higher Secondary Certificate)

Rajiv Gandhi Academy of E-Learning, Pune (MSBSHSE)

Percentage: 67.54% | Year of Passing: 2020

SSC (Secondary School Certificate)

Dr. Vasantdada Patil Madhyamik Vidyaniketan, Pune (MSBSHSE)

Percentage: 92.80% | Year of Passing: 2018

TECHNICAL SKILLS

Programming Languages: Core Java, Python (Strong), Go/Golang (Strong), JavaScript, Node.js

Backend Technologies: J2EE, JDBC, Hibernate, Spring, Spring Boot, JSP, Servlet, Express.js

Frontend Technologies: HTML5, CSS3, JavaScript, Angular, ReactJS

Database Management: MySQL, PostgreSQL

Frameworks & Libraries: Gin (Go), Express.js, Spring Boot, Hibernate, Ollama

Authentication & Security: JWT, Keycloak, OAuth

AI/ML & GenAI: Large Language Models (LLM), Ollama, GenAI Applications, Agent-based Systems, Autonomous Agents, Prompt Engineering, AI Integration

DevOps & Tools: Git, Maven, Docker, Docker Compose, REST API Development, CI/CD

Additional Skills: Microservices Architecture, API Development, System Design, POC Development, Agile Methodologies

PROJECTS

Sereni Base (NocoDB Alternative)

Technologies: Go, Gin, PostgreSQL, Keycloak, JWT, Docker

1. Building a comprehensive backend database management platform similar to NocoDB using Go programming language
2. Implementing RESTful APIs with Gin framework for efficient data operations and management
3. Integrated Keycloak for enterprise-grade authentication and authorization with JWT token management

Bill Generating Agent

Technologies: Python, GenAI, Agent Systems

1. Developing an autonomous agent system for automated bill generation using GenAI technologies
2. Implementing intelligent data extraction and processing capabilities

Grammarly-like Text Enhancement Tool

Technologies: Python, LLM (Ollama)

1. Created an AI-powered text enhancement application using Ollama LLM
2. Implemented features including spell checking, text rephrasing, grammar correction, and style suggestions

Authoring Tool

Technologies: Node.js, Express.js

1. Developed comprehensive backend system using Node.js for content authoring platform
2. Implemented RESTful APIs for content management, user authentication, and data persistence

Shopeezy (E-commerce Platform)

Technologies: Spring Boot, ReactJS, Hibernate, MySQL

1. Developed high-performance e-commerce platform with secure JWT authentication
2. Implemented efficient RESTful APIs and seamless data handling using Hibernate and MySQL

IGNITE (E-Learning Platform)

Technologies: Spring Boot, Angular, MySQL

1. Created comprehensive e-learning platform providing seamless user experience for managing courses, users, and payments
2. Designed and implemented robust RESTful API with Spring Boot integrating with MySQL database

Straggler Node Detection and Load Balancing

Technologies: Java, Machine Learning Algorithms

1. Built adaptive system for detecting straggler nodes in distributed networks with dynamic load balancing
2. Utilized J48 Decision Tree, Random Forest, and ANN Q-learning algorithms for enhanced job scheduling

CERTIFICATIONS

1. **JAVA FULL STACK** - Symbiosis Skills and Professional University
2. **PYTHON CERTIFICATE** - Spoken Tutorial, IIT Bombay
3. **PHP and MySQL CERTIFICATE** - Spoken Tutorial, IIT Bombay

STRENGTHS

Positive attitude, Quick learner, Strong expertise in Backend Development (Node.js, Go, Python), Proficient in AI/ML and GenAI technologies, Adaptable to new technologies and frameworks, Strong problem-solving and analytical skills, Experience in building POCs and innovative solutions, Excellent team collaboration and communication skills

PERSONAL DETAILS

Address: PMAY Sinhagad Society, Near Nanded City Main Gate, Pune-411041

Date of Birth: 20/03/2003

Gender: Male

Marital Status: Single

Languages Known: English, Hindi, Marathi
